

Unit includes:

- Fog machine
- Remote control
- Fog solution

Optional:

- Additional fog solution

Operating instructions:

1. Insert remote control into rear of machine.
2. To avoid risk of electric shock, plug unit into a grounded outlet. Make sure unit is on a dedicated line, and that no other appliances are on the same circuit. Do not use an extension cord.
3. If needed, fill reservoir with water based fog fluid. Always make sure that there is enough fog fluid in the tank before turning the fog machine on. Activating the pump Without fluid can cause damage to the pump and heat core.
4. Make sure cap to fog fluid is secure and that the plastic feeder tube is inserted into the solution through the cap.
5. When indicator light goes off (or on if it was off) the machine is ready for use.
6. At times the indicator light will come on (or off if it was On). This is normal—the machine is simply recycling. Depress the switch only when the light is off (or on if it Was off).
7. To use the timer mode, press "timer" button. Adjust "duration" knob for length of fog burst. Adjust "interval" knob for length of time between fog burst.
8. Allow fog machine to cool down before packing for transport.

****Caution****

Vapor from this fluid may be irritating to some persons with allergic sensitivity. Do not expose at close range to known asthmatics. Use in a well-ventilated area. To avoid injury from hot steam—keep away from nozzle at least 2 feet.
